SABI INFORMA COMBINES

an analysis software

General information and the annual financial statements of Portuguese and Spanish companies

An economic-financial, sectorial, and marketing analytical solution

MAIN FEATURES

Exclusive data analysis solution for financial information of Portuguese and Spanish companies.

ACCESS TO:

- Balance sheets
- Annexes and complementary information to financial statements
- Profit-and-loss statement
- Key ratios

FROM

- Customers
- Suppliers
- Competitors
- Others

900.000 Portuguese companies

2.900.000 Spanish companies

Financial data with a **25-year** track record

MAIN FEATURES

SEARCH

QUICK SEARCH

find a company by tax ID number or keywords.

FILE SEARCH

to cross-check an Excel file containing taxpayer numbers against the SABI INFORMA database.

ADVANCED SEARCH

filter any field in the database (geographical location, activity sector, financial data, etc.) and get the number and list of companies.

MAIN FEATURES

MULTI-CRITERIA SEARCH

SABI INFORMA will allow you to search by different criteria, which can be combined and modified according to your needs.

You can use the following criteria: name, code, tax number, location, activity, employees, financial data, legal form, brands, shareholders, status and others.

You can also upload a file with several companies, to analyze.

PRESENTING THE RESULTS

After the segmentation of companies, based on multiple search criteria.

List

The results are initially presented on a list, and you can then select the information (financial variables, companies' own data, auditors' opinion, etc.) that you are looking for from this list.

Lists can be exported to different formats, such as xls, doc, rtf or txt.

Reports

By selecting one of the companies that came out of the search, you will be presented with a full report, which can be displayed in several different formats.

You can choose financial reports from several years, up to a total of 25.

PRESENTING

THE RESULTS

- Evolution of a particular variable
- Evolution of several variables
- Financial statement structure
- Shareholder organization chart

There are several display options for the company's reports: balance sheet structure, evolution of one or several variables in indexes, organizational chart, etc.

DATA ANALYSIS

COMPARING
against the predetermined reference groups or selected companies (up to a maximum of 20).

STATISTICAL ANALYSIS
aggregation, distribution of a variable, concentration analysis, linear regression, group or segmentation reporting

- Company Segmentation
- Group Analysis
- Statistic Distribution
- Concentration Analysis

BENCHMARKING

The user selects the **companies to be compared.**

It’s possible to compare a company with another company, with a group of other companies, with a sector of activity, with competitors or even between sectors.

For every item of these compared companies, SABI INFORMA provides:

- **Amounts in euros**
- **The percentage it represents**
- **The variation** (from the previous year or another company)
